Combine Context and locale in order to define your displayed columns

Content Element 2

Content Element 2
· inherited

When creating a new channel, every element of the fallback will be displayed. You then go to single elements, can leave them as they are, transform it or hide it

- Use f for closed folders
- Use F for open folders
- You may also use this
- and this
- or this
- and this
- or even this
- and this
- Use - for a file icon
- or _ to leave a space for
- use spaces or dots for
- just like
- this

Do not forget to wireframe the Fallback / channel creation tool...

A clic on the view part will highlight the corresponding part in the fallback chain

-  Use f for closed folders
-  Use F for open folders
-  You may also use this
-  and this
-  or this
-  and this
-  or even this
-  and this
-  Use - for a file icon
- or _ to leave a space for
-  use spaces or dots for
-  just like
